Blended Intensive Program (BIP) Forest Remote Sensing

From Data to Impact: Monitoring and Understanding Forests with Modern Remote Sensing Technologies

Join an international, interdisciplinary program to explore how satellite, UAV and terrestrial data help us map, monitor and manage forests for a more sustainable future.

Satellite
Remote Sensing

UAV &
Aerial Imagery

Terrestrial
Laser Scanning

Forest Mapping
& Monitoring

Data Analysis
& Applications

Program Structure

Online classes (April – May)

- 8 interactive sessions
- 1.5 hours per week
- International teaching team

Face-to-face week in Eskişehir (beginning of July)

- Field activities and practical sessions
- Visits to research facilities
- International collaboration and cultural exchange
